

## DAC ARSW11C unterminated 50-Meter Subwoofer Cable

### Overview

DAC's ARSW11C is a premium 50-meter unterminated subwoofer cable designed for home theatre enthusiasts who demand top-notch low frequency audio performance. Engineered for superior bass response and minimal signal loss, this cable is perfect for creating expansive audio setups in larger spaces.

### Key Features

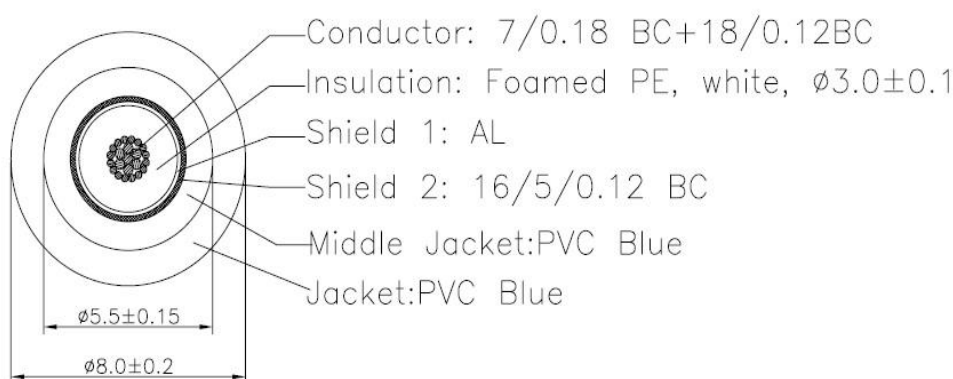

- **Premium Directional Design:** Optimized for one-way signal flow, ensuring maximum clarity and performance for subwoofer connections.
- **Oxygen-Free Copper Conductors:** Provides excellent conductivity, reducing signal degradation and enhancing overall sound quality.
- **Foamed PE Insulation:** Delivers superior insulation, minimizing interference and ensuring a clean signal path for optimal audio performance.
- **Dual Shield Construction:** Combines an aluminium foil shield with a braided copper shield to protect against electromagnetic and radio frequency interference, resulting in a clear audio signal.
- **Frequency Response:** Capable of handling a frequency range from 20Hz to 100Hz, delivering powerful and deep bass that enriches the audio experience.

### Technical Specifications

- **Cable Length:** 50 meters
- **Conductor Material:** Oxygen-free copper
- **Insulation Material:** Foamed polyethylene (PE)
- **Shielding:** Dual shield (aluminium foil shield and braided copper shield)
- **Frequency Response:** 20Hz - 100Hz

In summary, the DAC ARSW11C premium directional unterminated subwoofer cable is an exceptional choice for audiophiles and home theatre enthusiasts. Its advanced design and high-quality materials ensure reliable performance and powerful bass, making it ideal for large audio setups.
